

# Epson AcuLaser CX17 Series

## DATASHEET

The AcuLaser CX17 Series is Epson's most compact A4 colour laser-class all-in-one for small businesses. Every model in the series is neat, highly efficient and straightforward, without compromising performance or quality.

The series has everything a business user could require from a colour all-in-one. As well as its multi-function print, copy and scan capabilities, the CX17NF<sup>1</sup> and CX17WF<sup>1</sup> models come with a faxing function.

Each model only takes up the space of a desktop printer, making it ideal for maximising valuable workspace while still offering professional-standard results. A print resolution of 600x600dpi produces high-quality images, combined with vibrant and realistic colours thanks to Epson's AcuBrite toners. Performance is enhanced with a standard memory of 128MB across all models.

Delivering up to 15 mono pages per minute and 12 colour pages per minute, the series has one of the fastest colour print speeds in its class. All models have USB connections and the CX17NF<sup>1</sup> comes with Ethernet connectivity for multiple users. Connectivity options are expanded to include Ethernet and Wi-Fi on the CX17WF<sup>1</sup>.

This series has been developed with the business user in mind and provides low-maintenance, peace-of-mind printing. The toner cartridge is the only supply item requiring replacement, which also helps to keep the total cost of ownership down.
