GELJET™ : Affordable colour for every need

Want to give your customers and employees affordable, high quality colour documents on demand? You can with the Aficio SG 2100N/SG 3110DN/SG 3110DNw. These innovative GELJET printers have a small footprint, full front access and easy connectivity including WiFi (SG 3110DNw). They feature Ricoh's fast-drying Liquid Gel™ technology to simplify colour printing in shops, businesses and home offices everywhere.

The GELJET™ advantage

GELJET printers use fast-drying viscous, pigment-based Liquid Gel™ that does not permeate paper and dries fast. It delivers high quality colour at low cost on plain paper. And, because Liquid Gel™ dries instantly, it also enables high speed duplex printing.

Unique ECONomy Color

In ECONomy Color mode, GELJETs can distinguish between text and images – text is printed solid black, while image thickness is reduced by half. So you get quality colour documents at virtually the cost of black & white.

User-friendly design

With the control panel and operations accessible from the front, these versatile printers fit virtually anywhere. There is also easy USB and network connectivity, plus WiFi with the SG 3110DNw, and simple envelope setup straight from the printer driver window.

Improved productivity

Get your first colour print in 6.5 seconds. Enjoy fast output at up to 29 ppm and uninterrupted print runs using high capacity paper tray options. Easily print banners, envelopes and custom papers thanks to the Multi Bypass Tray option.

Avoid outsourcing

GELJETs can handle a wide range of paper sizes and weights. You can even print double-sided with the SG 3110DN and SG 3110DNw's paper-saving duplex units. This gives you the flexibility to create a variety of professional-looking colour documents in-house.

Reliable, secure and compliant

GELJETs have a simple architecture with a minimal number of highly durable parts. This ensures maximum reliability and long life. They also comply with the latest Energy Star and Blue Angel (BAM) international standards for energy efficiency and environmental friendliness.

Green cost-efficiency

With a partially recyclable plant-based plastic chassis, toxic free materials and energy-saving features, GELJETs reflect Ricoh's environmental commitment. GELJETs consume 90% less power than a colour laser printer, which not only reduces CO₂ emissions - it also lowers your TCO.
