brother[®]
at your side

Professional printers for your growing business.

Brother's 'best selling' laser printer range just got better with this new series of professional models which are packed full of time, cost and energy saving features. Offering your business high performance duplex printing as standard throughout the range.

At your side.

Brother's 12 month on-site warranty gives you the ultimate peace of mind that if something did go wrong, Brother will do its utmost to put it right.

Reliable, fast high quality printing.

This range of mono laser printers delivers real time-savings for your business with impressive 30 pages per minute printing speeds. Speed doesn't mean a compromise on quality; you'll be delighted with the sharply defined text and clear business graphics for all your documentation.

Cost effective.

We understand the pressures on businesses to achieve more with less, reduce costs and increase efficiency, which is why this range of mono laser printers has been designed to reduce your total cost of ownership. The range includes:

- **Automatic duplex** feature as standard which allows you to take advantage of double-sided printing for all your documents. Significantly reducing your paper cost and your carbon footprint.
- **Optional lower tray** and high yield toner for high volume printing – giving you flexibility for when your business grows.
- **8000 pages*** of toner as standard in the box – equivalent to 120% more pages in the box compared to any other mono laser printer in its class.*
- **Energy Star** certification to reassure you that your laser printer has minimal impact on the environment – and your budget.

Top Tip: Reduce your paper costs and carbon footprint even further with our booklet printing feature which allows you to reduce your documents to A5 booklets, making them look professional and easy to read, whilst helping you to save up to 75% on paper costs.

Consumables that help to save you time and money.

All Brother's mono laser printers come with a separate toner and drum, which means you only need to replace the one that runs out, keeping your running costs low. And to keep it simple we've positioned the cartridges at the front so you can change them easily.

*HL-5380DN only (Declared yield value in accordance with ISO/IEC 19752)

Choose the **right model** for your needs.

We've introduced an extensive range of mono laser printers to suit every business need and budget. Think about your office needs and future requirements – do you need network facilities, for example? Check the table to find the right model for you.

PIN Protected Printing

Apply a PIN to printed documents ensuring prints stay confidential

Intuitive LCD Screen

Displays the status of the printer at a glance

Separate Toner & Drum

Reduce cost with Brother's high yield separate toner and drum

Standard Yield Toner	TN3230
High Yield Toner	TN3280
Drum Unit	DR3200

Solutions with you in mind.

At Brother we are constantly listening to your needs and providing solutions in response to those specific requirements. Our latest range of mono laser printers can help you and your business work more efficiently and deliver many benefits.

Network ready.

Maximise your desk space - four out of the five models available are network ready 'out of the box'. Your laser printer is now even more cost effective as it can support a workgroup of people in the office who can share all of its printing capabilities.

Wireless connectivity.

To help you future proof your growing business the HL-5370DW is compatible with both wired and wireless networks. You can introduce wireless to your business when you are ready. **It is the only wireless ready laser printer in its class.** With its one-touch secure easy set up, you can instantly configure your printer network at the touch of a button.

Effective printer management tools.

Managing a fleet of printers over a network can be an unwanted and time consuming burden. The HL-5300 series* comes with network management software allowing you to manage your printers from a central location.

Intelligent printing.

Ever printed an urgent document to an office printer only to find the paper has run out or the toner is empty? In addition to the extra paper capacity option and high yield toners, the intelligent HL-5300 series* can email you if there's a problem, keeping your office working efficiently.

PIN protected printing.

The built-in LCD screen on the HL-5380DN enables PIN protected secure printing, so you can control printing of confidential documents in an open office.

SSL (Secure Socket Layer).

Widely used in e-commerce to prevent unlawful access to bank and credit card details, SSL encryption has now been incorporated into Brother's new network laser printers, ensuring all your most confidential information will remain just that – confidential.

Prescription ready.

Brother printer trays are prescription ready 'out of the box' which is why Brother is the **number one** choice for GP surgeries.

Carbon copy.

When you have the optional lower tray fitted you can take advantage of Brother's carbon copy feature. It's just like having a traditional carbon copy book at your finger tips – perfect when you need duplicate items printing, such as invoices and sales orders. They can be printed automatically from different trays onto different coloured paper or with some of the details omitted, to suit your needs.

Barcode printing.

Barcode printing comes as standard on all the laser printers, requiring no further software purchase, so you can print accurate barcodes whenever you need them.

Recycle with ease.

Through its award-winning recycling plant in Ruabon, Wales, Brother is committed to recycling your Brother consumables free of charge via a pre-paid labelling service.
