COPY

SCAN

PHOTOCAPTURE
CENTRE™

The perfect multifunction machine for your home office, to handle all your colour printing, copying and scanning needs in one - and with a Photocapture Centre™ for direct photo printing.

The DCP-350C is a smart looking machine that will fit nicely in any home, whether you have a separate room to work from home or not. It combines fantastic colour print and copy functions to rival any standalone machine.

So if you've got work to bring home, at 30 pages per minute in mono and 25 pages per minute in colour, it'll whiz through your printed documents. And if you need to run off leaflets for your local sports club or an all-important presentation you can scan and copy a full colour set in minutes.

As with all Brother multifunction printers, it is easy to use and great value for money. We've put the ink cartridges at the front so you can change them easily. And because we use separate ink cartridges you only have to replace the colour that runs out, saving you money in the future.

The DCP-350C is also a fantastic photo printer. With its full colour LCD screen you can plug in your camera, memory card or USB stick and see the images on screen. What's more you can enhance your photos on the PhotoCapture Centre™ without the need for a PC, removing red eye and repositioning them until you have the perfect picture. You'll be delighted with the results – don't leave your photos on

the camera for months anymore; display them all around the house! We've even put in a second paper tray so you don't have to worry about changing the paper, it's ready every time you want to print photographs.

To achieve high quality printing we recommend using Brother's Innobella™ ink and paper technology.
