- Telephone handset and answering machine
- Colour faxing with 80 speed dials
- Up to 10 sheet Automatic document feeder for easy faxing, copying and scanning multi page documents.
- Four individual ink cartridges with fade resistant ink.

MFC-680CN

A stylish communication centre that's surprisingly compact, versatile and easy to use.

This is the must-have multifunction printer for every home office or small office environment. The MFC-680CN can handle all your full colour printing, faxing, copying and scanning needs as well as any standalone machine. It also includes a communication centre, with a fully featured telephone handset and integrated answering machine, so you never miss that important call.

We've given you everything you might need in an office environment in one stylish compact unit. It comes network-ready so its features can be shared with the rest of your team or even the family.

Our customers love the 3.3" wide colour LCD display. It gives them complete control and functions can easily be changed at the touch of a button. This machine means business so we want you to be able to use it to its full potential. That's why we've kept it simple.

Our ink cartridges can be found at the front so you can change them easily, and because we use separate cartridges you only have to replace the colour that runs out, saving you money in the future. Its Automatic Document Feeder makes light work of copying, faxing or scanning multipage documents. There's even a separate plain paper and photo tray giving you optimum results with the minimum of fuss.

The MFC-680CN is also a fantastic photo printer in its own right, producing life-like quality images. You can plug in your digital camera, memory card or USB stick and display your photographs on the LCD screen. What's more, with its PhotoCapture Centre™ you can enhance your photographs, for example remove red eye and change the images landscape or portrait so you get the perfect picture before printing.

The results are stunning and the whole family will want to use it! And with the clever integrated photo paper tray you don't have to worry about changing paper, it's ready every time you want to print your precious memories.

To achieve high quality printing we recommend using Brother's Innobella™ ink and paper technology.
