We're always at your side

Office quality moves out of the big office.

Thanks to the new HL-5030 from Brother, working from home or small office no longer means compromising on quality. Quite the opposite, in fact. This super efficient mono printer – ideal for Windows® environment printing – offers professional quality (600x600dpi), rapid turn-around (up to 16 pages a minute), and generous output (as many as 20,000 pages per month), all from a surprisingly compact and economical unit.

Nor does it end there. The HL-5030 also has an impressive 4MB memory, an ample 250 sheet paper capacity, and optimised drivers for a variety of Windows® uses, together with software that automatically prints e-mails for your perusal. It's also as simple to install as it is easy to use, with interactive animations providing a step-by-step guide.

The new HL-5030 from Brother. It has all the features of the big office printer save one, the price.

Discover more answers to business problems at Brother's Solutions web site.
