1.	Print speed may vary depending on system configuration, interface, software, document complexity, print mode, page coverage etc. and does not take account data processing time on host computer. Document print speed on plain paper is measured on the test standard of ISO/IEC FCD 24734.
2.	To use this feature, you will need to subscribe for a Caller ID service (only available in some countries). The Caller ID feature uses the ETSI EN 300 778-1 protocol. Contact your local telephone company for detailed information on this service.
3.	Copy speed may vary depending on document complexity, copy mode, page coverage etc. and does not take into account warming up time. FSOT and ESAT ADF copy speed on plain paper is measured on the test standard of ISO/IEC FCD 24735.
