EXCEED YOUR VISION

FLAWLESS COLOUR

EPSON ULTRACHROME
INK

VIVID MAGENTA

These fast, flexible 24" and 44" printers give your professional printing even more impact with the addition of Vivid Magenta to the Epson UltraChrome Ink set. With more accurate, longer-lasting, life-like colour they will transform the way you print POS materials, CAD/GIS prints and more.

Black

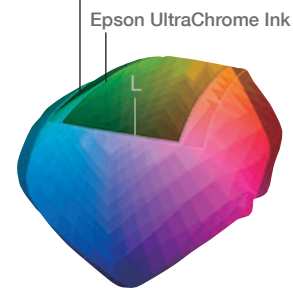

Matte
Black

Two black inks for greater versatility

The ink set includes both Matte and Photo Black inks, which maximises quality on your chosen media, including glossy photo paper. The printer will automatically select the optimum ink to match the media, which adds convenience and productivity whatever you print.

Expanding the world of colour

Epson UltraChrome Ink with Vivid Magenta

The addition of Vivid Magenta combines a wider colour gamut with enhanced colour accuracy. This is particularly noticeable for blues, magentas, reds and oranges, which means your prints will be more natural and life-like than ever.

Longer-lasting prints

The printers produce results that are highly light-fast, so your prints will retain their colour and quality for longer, wherever you use them. Also, the specially formulated pigment inks are water-resistant, so you can rely on making a bigger impact for longer, even in outdoor conditions.

Excellent colour stability

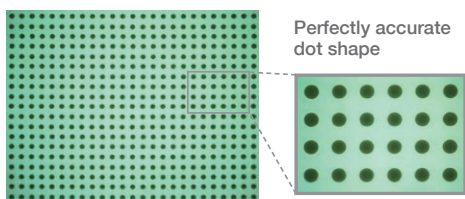

When using Epson UltraChrome Ink with Vivid Magenta you can be sure your prints will be dry and stable very quickly. This gives you accurate colour you can rely on and work with just minutes after your prints emerge from the printer.

FAST, EFFICIENT PRINTING

The Epson Stylus Pro 7700 and 9700 are packed with the latest Epson technologies that add precision, reliability and productivity to a wide range of professional printing needs. Together they give you the finest quality output without compromising speed.

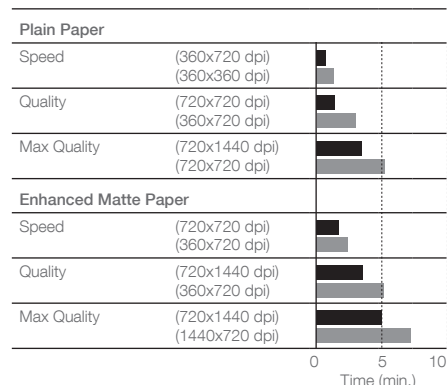

Our most advanced printhead ever

The new Epson MicroPiezo™ TFP printhead combines improved performance with greater durability. Optimised to work with Epson UltraChrome Ink with Vivid Magenta, it delivers perfectly accurate dots with virtually no misting or satellites. It also works with Epson Variable-sized Droplet Technology to produce droplets as small as 3.5 picolitres for perfect smoothness and detail.

Better results at faster speeds

PRINT SPEED COMPARISON*

Key:
 Epson Stylus Pro 9700/7700 (Black square)
 Epson Stylus Pro 9450/7450 (Grey square)

These printers are designed to give you faster output without compromising print quality. They do this by using advanced compression and decompression technologies that speed up data throughput during printing.

Auto nozzle check system

This system uses a sensor to verify nozzle status and clean the printhead if necessary, which means you can print more reliably for longer. It's automatic, uses no media and takes less than 15 seconds from start to finish, and can run between unattended print jobs for added peace of mind.

Times New Roman Times New Roman
 720x720 dpi mode 1400x1400 dpi mode

Special mode for line drawings

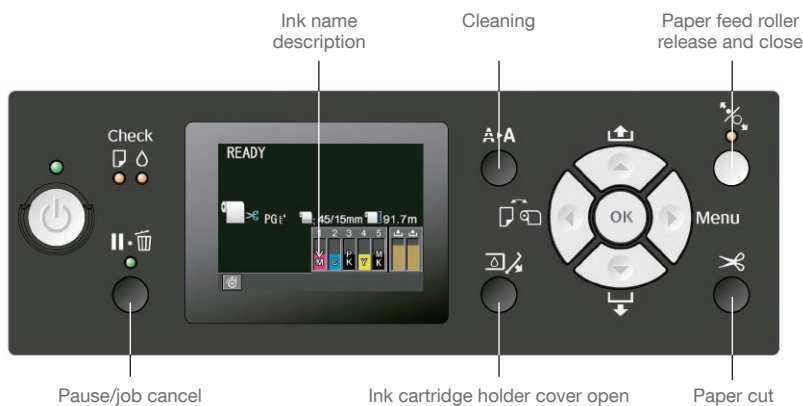

A special 1440x1440 dpi mode works with certain media to add sharpness to line drawings and alphanumeric characters. This mode also enhances speed to give you better results faster than ever.

SIMPLE EXCELLENCE

A range of features make the printing process as easy as possible, and gives you the flexibility to match your printer to the way you print. Fast network connection, clear, simple control and straightforward operation and maintenance are built-in.

Colour LCD panel

The bright colour LCD gives you easy control of all aspects of your printer, from ink levels and quick cleaning to paper cutting and job cancellation. With clear buttons and the high-visibility 320x200 pixels colour screen you're always in charge.

Barcode printing

Barcode printing makes it easy to keep track of media during changes. Simply print the barcode before the roll is removed, and you'll know exactly how much is left, so you'll never have to deal with misprints because there's not enough paper on the roll.

Versatile connectivity

These printers are 100Base TX/10Base T Ethernet network-ready, making them easy to install and share across your office or studio. There's also a USB 2.0 port, with sophisticated compression and decompression technologies for fast data processing.

Choice of two ink cartridge sizes

Choose from two cartridge sizes to suit your printing. With 350 ml or 700 ml available, you can ensure maximum productivity with minimum cartridge changes.

Easy paper handling

The new spindleless flange system makes changing paper easier and takes less space. It handles all media types, sizes and tensions. Switch between two and three inch positions, with the skew and back tension handled automatically.

The new rotary paper cutter is more durable, cuts smoothly and cleanly in seconds, and cuts every type of roll media so there's no need for manual cutting.

TOTAL CONTROL

Intelligent software helps you to get the best from your printer, whether it's keeping track of all aspects of printing, streamlining the way you work or getting creative.

New printer driver

The new intuitive printer driver is easy to use and can be customised to give you the look and level of information you want. Choose from various print and media settings, and use the Epson LFP Remote Panel 2 Utility Software for functions from Firmware Updater to Custom Page Setup.

HDI driver

These printers include the drivers to support the Heidi Device Interface (HDI) graphics used by AutoCAD, so you can rely on high speed and precision accuracy.

New layout manager

A number of layout options add efficiency to print jobs created in various applications and sizes. Options include minimising white space to reduce wasted paper, fit to roll and free arrangement.

Epson CopyFactory software

This software makes it a one-touch job to scan and enlarge small documents into larger formats with no loss of image quality, so you don't need to save large images on your computer. Advanced features include auto skew correction, colour matching and text overlay.

MEETING DEMANDS

From business to education, these versatile printers give you high-quality, eye-catching prints that do the job perfectly. With industry-standard quality, accuracy and durability, they combine all the features you need to transform the way your business works.

Flexible print solution

Delivering high-quality prints for business, POS and education, you can depend on the Epson Stylus Pro 7700 and Epson Stylus Pro 9700 to free up your creativity and improve productivity. Jobs that once needed to be outsourced can be brought in-house and handled faster and more efficiently, and with reliable overnight printing you can always meet the tightest deadlines.

Retail

It's easy to produce eye-catching materials that look better and last longer – in-store or outdoors. Perfect for cost-effective, on-demand POS posters and signage.

- In-house signage/POS
- On-time, on-demand printing
- Advertising/display

Education

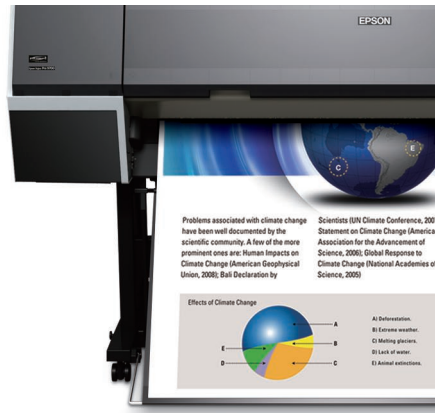

These printers are ideal for schools and other academic institutions, libraries, museums and local government offices. They add high-quality colour to educational materials, cost-effectively and at high speed.

- On-demand course materials
- Professional quality posters
- Seasonal event materials

CAD and GIS users

Bring map, drawing and design printing in-house. Civil engineering and construction companies, design departments and public offices can produce professional quality prints for presentation or storage – quickly, cost-effectively and easily.

- Accurate data analyses
- Dependable quality
- Specialist line drawings

PRODUCT SPECIFICATIONS

PRINT TECHNOLOGY	Auto Head Alignment technology, Auto Nozzle Check technology, Epson new LUT technology 10-channel Epson MicroPiezo™ TFP 360 nozzles x 10 lines Bi-directional printing, uni-directional printing
PRINT QUALITY	Maximum resolution 1440x1440 dpi (2880x2880 dpi possible with RIP), Epson Variable-sized Droplet Technology Minimum ink droplet volume 3.5 pl
