* estimated yield at approximately 5% coverage

When it comes to performance, Lexmark's new E332n and E332tn printers outshine other printers in their class in terms of speed, memory and paper handling. Armed with a 200 MHz processor and 32 MB of memory, they zip through even the most complex print jobs with no problem. And the E332tn comes standard with an additional 550 sheet paper drawer (optional with the Lexmark E332n), offering an even bigger boost in input capacity. The perfect printers for serious workflows!

Reliable and easy to manage

Integrating seamlessly into your existing network infrastructure, these printers require minimum attention. You'll benefit from an IP set-up utility for "zero configuration" device discovery on local and remote subnets and a wide range of network-management tools, such as automated email alerts and printing statistics. With the Lexmark E332n and E332tn, you can focus more on your business and leave the printing to Lexmark!

Small footprint, small price

The Lexmark E332n and E332tn are designed with efficiency in mind. As compact printers, they fit easily in space-sensitive workplaces - and their price tags are just as attractive as their sleek new industrial design. You'll save considerably on running costs thanks to their high yield toner cartridges, which can be changed without replacing the photoconductor unit - so you replace only what you need!

PRINT-MOVE-MANAGE services

Supported by Lexmark award winning technology, innovative business applications and strong strategic service offerings, Lexmark's highly skilled, specialised account team can assist your organisation to print smarter, move critical information faster and manage your output related costs more efficiently.
This value proposition, Print-Move-Manage, translates into a set of industry-specific solutions and expertise allowing you to improve, maintain and manage your document and printing infrastructure.

PRINT: A full range of advanced printing solutions based on industry leading technology and associated product services that provide leading edge functions at a very competitive cost. These include printers, multifunction devices as well as network and application-specific hardware and software solutions

MOVE: Consulting and implementation services designed to increase productivity while reducing the costs related to your paper-intensive processes through device consolidation, distributed document capture, distributed printing, electronic form integration and paper document workflow automation

MANAGE: A range of services offerings designed for today's business. Starting from the traditional leasing of equipment through per page based billing up to full contract management and outsourcing of your output device fleets. These offers are designed to deliver you the most cost effective solution for output and document management.
