

The C5500 Series colour and mono Multifunction Products

C5510 MFP
C5540 MFP

All together better for your business.

The OKI Printing Solutions' C5500 Series offers your business something it has never been able to benefit from before: fast, affordable colour and mono printing, copying, network scanning and PC faxing from an A4 Multifunction Product (MFP). Consider the alternatives and you'll see what an important breakthrough this is. Colour inkjet MFPs? They are too slow for anything but the lowest volume printing and copying. Copier-based MFPs? A very expensive option compared to the C5500 Series. Mono laser MFPs? With the arrival of affordable colour and mono printing, copying and scanning, why settle for mono only? So if you need colour and mono printing and copying with scanning and PC faxing functionality – and you need it to be fast, easy to use and cost-efficient – the C5500 Series of MFPs is your only serious choice.

Best in its class. Best for your office.

The C5500 Series of MFPs is based on the same proven digital LED technology as OKI Printing Solutions' award-winning C5000 Series printers. Reliable, single pass technology offers superior print quality, higher speeds and fewer paper jams thanks to a straight paper path and fewer moving parts.

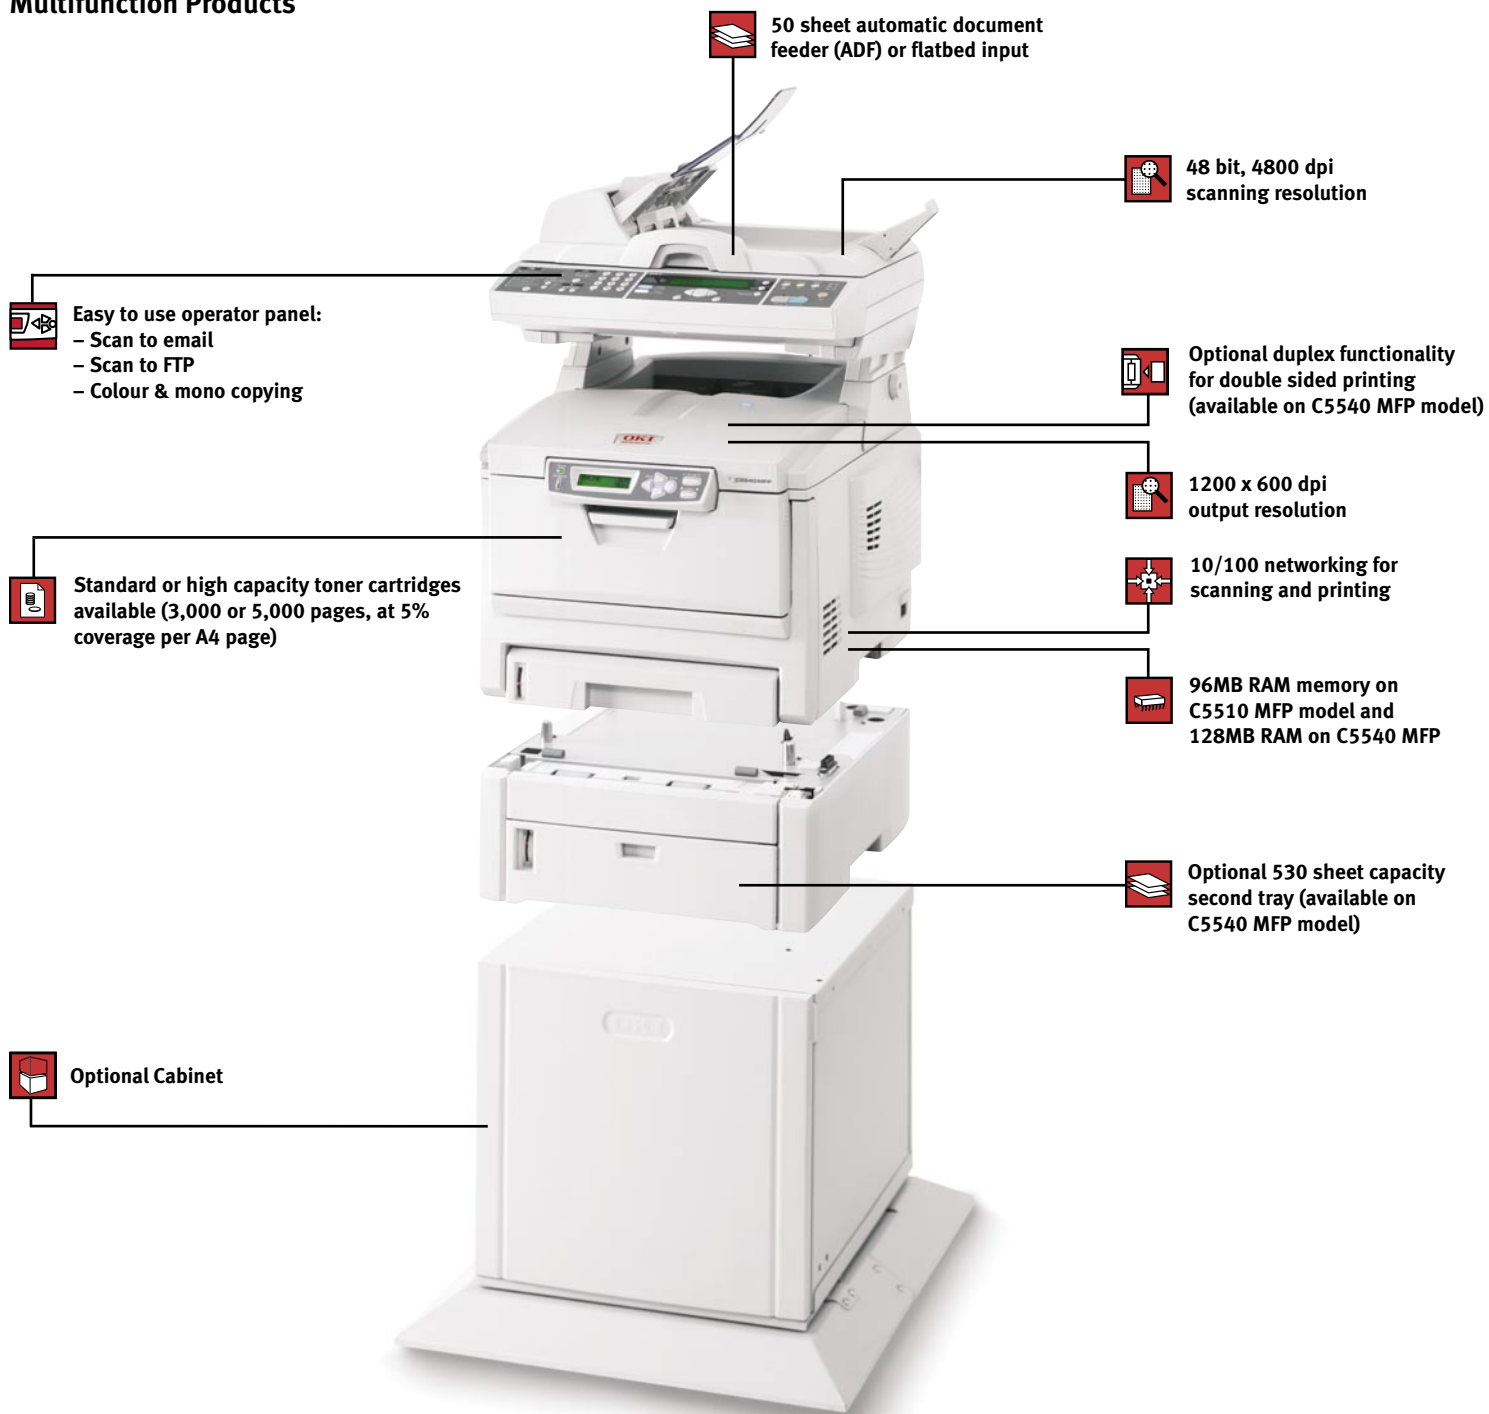

The C5500 Series are the fastest colour A4 MFPs on the market – the C5510 MFP allows 12 copies per minute (cpm) colour and 20cpm mono, while the C5540 MFP delivers an even more impressive 16cpm colour and 24cpm mono. That's copying and printing 3 to 4 times faster than inkjet MFPs – with running costs no higher than our C5000 Series printers. It's the only A4 single-pass MFP on the market.

By rationalising your hardware the C5500 Series of MFPs allows your business to optimise use of space and resources; minimise running costs; and maximise productivity.

Scan documents and email them directly from your C5500 Series

The C5500 Series Colour and Mono Multifunction Products

● Standard ○ Optional

Space saving. Cost saving. Time saving.

Fast, reliable printing and copying in colour and mono; PC faxing; scanning to email, FTP or archive; network scanning and printing: the C5500 Series brings all this together in one compact affordable package. So why clutter your workspace and complicate your budgeting with an array of different machines when one product makes it all so easy?

The intuitive operator panel enables you to make copies quickly and easily and also make the most of the powerful network scanning. Emailing hard-copy originals from your C5500 Series is as easy as sending emails from your PC – the operator panel gives you access to email and FTP address books at the touch of a button. Intelligent software on your PC enables you to easily file and store your documents electronically, eliminating the need for filing hard-copy documents. Optical character recognition (OCR) software allows you to turn these scanned images into text documents that can be edited. Easy to use fax software enables you to send faxes from your PC without the need for a separate telephone line for the device.

For scanning multiple pages there's an Automatic Document Feeder, as well as the flatbed scanner, which enables you to scan up to 50 sheets hassle-free. The C5540 MFP uses PCL and postscript language and there's even the option of automatic duplex capability, allowing you to produce impressive double-sided documents and booklets quickly and confidently. In fact, everything about the C5500 Series is designed to make your life easy.

Indeed, at OKI Printing Solutions, we are well aware of the importance of printed communications to the success of your business, we aim to empower every user to achieve the best possible results every time. We call this commitment **Chromability™ – in-house colour made easy, only from OKI Printing Solutions.** You'll see evidence of it in our unique Template Manager software which enables you to produce a range of professional looking documents – from business cards to banners up to 1.2m long – without costly outsourcing. You'll also see it in the 'Ask OKI' tab in the driver, which takes you straight to an information-packed web site specific to your product, helping you get the most from your MFP.

Why OKI Printing Solutions?

We believe that effective printed communications are fundamental to successful businesses. That's why we focus purely on understanding their diverse printing requirements. Through our considerable technological resources we develop fast, high quality, cost-effective printing solutions that will benefit businesses today and long into the future.

It is the same progressive spirit that drove Kibitaro Oki to found Oki Electric in 1881, and which helped his company to become the global, multi-billion euro business that it is today. A business whose people share one single-minded purpose: helping other businesses grow and prosper by enabling them to create the best possible impression with their printed communications.

We led the way in making in-house colour printing fast and affordable. Now OKI Printing Solutions lead the way in making it easy. This means more than providing unique technologies and in-built functions like fast, single-pass colour, double-sided printing, and banner printing: it means making those functions as easy to use as possible – first time, every time. We call this **Chromability™ – in-house colour made easy, only from OKI Printing Solutions**. In short, it's about getting the most from your investment.

Our colour-coded segments are designed to help you save time. When you want to add another printing solution to your business, or check out the latest advances in technology on our website, simply use the colour guide below.
