Phaser[®] 8860 / 8860MFP

A new way to think about **Colour.**

Phaser® 8860 / 8860MFP

Colour by numbers

Xerox solid ink technology revolutionised office printing. For the first time, you could print brilliant colour without sacrificing the speed, ease-of-use and reliability you came to expect from black and white devices. Now, solid ink eliminates the one remaining barrier between you and everyday colour printing: Cost.

With the Phaser 8860 printer and 8860MFP multifunction printer, you get amazing colour for the same low cost as black and white.

It's time to say hello to the power of colour in every office document you produce. And say goodbye to worrying about how much it costs. Colour printing. Black and white price. It's that simple. Finally.

But low-cost colour means nothing unless the colour you get consistently meets your highest expectations. And rest assured, the Phaser 8860 and 8860MFP deliver colour output that's truly exceptional, page after page.

So rejoice, small to medium-size workgroups with high-volume print demands. There's never been a better opportunity to unleash your creativity and get the results you're after while taking care of your bottom-line document costs.

Go ahead, do your best work.

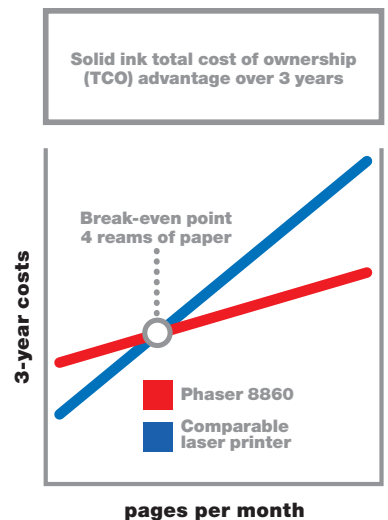

And make it colourful.

Black and white or colour – same low price

If you could do all of your company's printing in attention-grabbing colour for the same low price as black and white, why wouldn't you?

Using colour in your business-critical documents is the easiest way to achieve the best results – more sales, better retention, higher response rates and fewer mistakes. The Phaser 8860 printer and 8860MFP multifunction printer make it easier and more affordable than ever.

The print volume advantage.

If your monthly print volume averages four reams of paper or more, the Phaser 8860 colour printer and 8860MFP multifunction printer deliver a cost of colour that's by far the best deal going.

Print right the first time.

True Adobe® PostScript® 3™ and automatic colour enhancement tools ensure that colour-intensive documents print reliably and accurately.

Enhanced image quality. For photo-quality colour, and when you really want to impress, choose 2400 FinePoint™ print resolution mode. The super-fast draft mode is perfect for everyday prints and proofs.

More colour possibilities.

Xerox solid ink prints a wider range of colours than most colour laser devices. Count on solid ink technology to accurately print the "right" colour and the smoothest blends and gradients.

Quality control. Beyond its outstanding page-to-page consistency, Xerox solid ink prints consistently printer to printer. That means important documents printed at the branch office look exactly as they do when printed at headquarters.

Consistency. Consistent colour, print after print. No other technology delivers such exceptionally consistent colour quality – an important attribute for long print jobs or multiple prints of the same page.

Award-winning technology.

With more than 50 major awards since its introduction, Xerox solid ink is a clear favorite among industry experts.

Solid-fill superiority.

Say goodbye to all the "banding" that's often found in large areas of colour. Xerox solid ink eliminates the problem, specialising in dense, saturated colour – even tricky mid-tones like sky and skin.

Professional-quality colour matching. When colour accuracy is a must, built-in PANTONE® spot-colour correction tables ensure quick and easy PANTONE colour matching. Get true renditions of important business colours – like your logo.

High-performance colour, low black-and-white price. With the Phaser 8860 printer and Phaser 8860MFP multifunction printer, you get advanced features and unbelievable colour for the same low cost as black and white.

Phaser® 8860 / 8860MFP

It is easy being environmentally friendly

Welcome to the world of solid ink – a place where bright, vivid colour for the same low cost of black and white is just the beginning. It's where all of our colours – cyan, magenta, yellow and black – become environmentally friendly.

And it's all made possible with Xerox solid ink, the office colour solution with a cartridge-free design and minimal packaging. That simple combination means less energy used during manufacturing, drastically reduced landfill waste, and less storage space for better transportation efficiency and far fewer delivery trucks on the road – saving you shipping costs while benefiting the environment.

Now, busy workgroups that use the Phaser 8860 printer or 8860MFP multifunction printer for their important documents not only gain an edge in today's ultra-competitive business environment, they also get their best work done in a way which has less impact on the natural environment.

So be environmentally friendly with Xerox solid ink – your easy, responsible, full-colour office document solution.

118 kg vs. 11 kg of waste

Think beyond the ink. The benefits of solid ink go beyond cost and colour quality.

Over the course of printing 144,000 pages, the waste generated by typical cartridge-based toner amounts to an astounding 118 kg Xerox solid ink, on the other hand, produces only 11 kg of waste — an amazing ratio of more than 10 to 1.

No-fuss drop-in loading.

Xerox solid ink sticks are engineered for maximum ease of use. Each colour has a unique shape, making it impossible to misload. And because solid ink can be replenished before the device runs out, there's no device downtime when replacing ink.

One consumable. Ink. That's it. No big, bulky print cartridges, or fusers, fuser oil or imaging units found in a typical colour laser printer. The only other replaceable item is a maintenance roller, which lasts for tens of thousands of pages and only needs to be replaced a few times throughout the life of your device.

Efficient use of paper.

Standard features like automatic two-sided printing and N-up printing fit more output onto a single sheet, saving time, trees and money.

Save valuable space. Solid ink packages are small enough to easily fit in your desk drawer. There's no more need to take up an entire cabinet with printer supplies.

Recycled paper welcome.

With solid ink, there's no need for "special" recycled paper. Print on any recycled stock – or almost any media, full stop – and get vibrant, high-quality colour. Plus, solid ink print outs are completely recyclable.

Print more. The solid ink imaging process is extremely efficient, producing nearly 100 percent ink-to-page transfer during normal printing. Solid ink does not leave behind residual toner and developer excess that collect in the waste container after each print.

Cartridge Free. Solid ink is just that: solid. Unlike laser print cartridges, it's safe to handle and there's nothing to spill, leak or smudge on your clothes. It's the no-mess colour solution that's 100 percent dust free.

Multiple functions use less power.

The 8860MFP multifunction printer does the work of several stand-alone office products (printer, copier, scanner and fax) while consuming significantly less electricity.

Phaser® 8860 / 8860MFP

The reliable, no-hassle people pleasers

Friends to both your bottom line and the environment, the Phaser 8860 colour printer and 8860MFP multifunction printer also pack the performance and ease of use to satisfy the rigorous demands of busy workgroups.

Whether you need robust printing or the additional capabilities that come with a true multifunction powerhouse, these two office devices are designed to make office life easier than ever. And with crowd-pleasing productivity as the benchmark, you're assured that every feature, function and design consideration exists to help your staff happily produce their best work.

And total ease-of-use goes hand-in-hand with real-world reliability, which is one more way the Phaser 8860 colour printer and Phaser 8860MFP multifunction printer excel. Designed with a straightforward, virtually jam-free paper path, the devices contain far fewer moving parts, which means less room for failure and more smiles on the faces of those who demand reliable, everyday productivity.

Built for speed

These devices are built to keep up with your busy department's workload, with a super-fast print speed of up to 30 ppm for both black and white and colour.

Solid ink's colour-optimised architecture and a fast controller give you the most important advantage for typical office colour printing: A fast first-page-out time. As fast as five seconds, in fact.

Print more without interruption.

A 100-sheet tray for a wide range of custom media and sizes, plus a generous 525-sheet tray, come standard. Add one or two 525-sheet trays for a total capacity of 1,675 sheets and even more interruption-free productivity.

All in one, one for all. With powerful printing, copying, scanning and faxing, the Phaser 8860MFP multifunction printer makes it easier for more people to get more work done. Plus, there's no waiting because multiple functions can be accessed at the same time: scan while printing or receiving an inbound fax, and walkup users can interrupt a print job to make a copy.

From paper to digital to more possibilities. Organise, edit, and distribute files with powerful onboard scanning tools. Scan files straight to your desktop, or to a public or private folder.

Super-easy scanning. Now scanning is as easy as making a copy, with no extra steps needed. Quickly turn loose paper documents into ultraportable digital files.

Security first. Built-in security tools keep your data safe and sound. Secure Print holds hard-copy output until a PIN is entered, and Hard Drive Overwrite electronically "shreds" data after every job or on request.

Helpful, intuitive control panel. Get continuous printer-status updates, change device settings, see which of your colleagues is currently printing, or cancel a print job on the spot.

More power. A 750 MHz processor and 512 MB of memory (upgradeable to 1 GB) do some serious heavy lifting, making quick work of even the most intense projects. And these devices work hard for longer, with a monthly duty cycle of 120,000 pages – that's 240 reams of paper!

Intelligent ready. The devices monitor usage history and automatically warm up just before the first page of the day is anticipated.

Built smart. PrintingScout® technology monitors your print projects. If a potential issue arises, a helpful pop-up alert suggests a remedy. Plus, an internet support system provides fast help when you need it.

Keep tabs on office activity. The usage analysis tool enables you to collect, organise and analyse job accounting data.

	Phaser 8860DN	Phaser 8860MFP/D
Speed	Up to 30 ppm colour / 30 ppm black and white
