A great choice when space is at a premium.

Have the confidence that this compact, A4 business printer, quietly delivers high-quality documents when you need them.

MFC-L2960DW

Key features:

- Printing up to 34 pages per minute (ppm)
- 2-sided print; up to 16 sides per minute (spm)
- 2-sided scan; up to 22.5 images per minute (ipm)³
- Ethernet, 5GHz Wi-Fi
- 8.8cm colour touchscreen
- Print from PC or mobile app
- 256MB internal memory
- 50 sheet, 2-sided automatic document feeder (ADF)
- 250 sheet paper input tray¹¹
- Comes with 1,500 page yield toner, 5,000 page super-high yield available⁷
- Compatible with Brother and 3rd party solutions¹⁹
- Available under a managed print service (MPS) contract

Lower energy technology

Our innovative planar heating element technology (PHE) enhances thermal efficiency within the device which minimises the energy required before printing. This new technology delivers a 27.8% reduction in typical electricity consumption (TEC) which leads to a shorter warm-up time, meaning the first page from sleep is printed in half the time.

Compact and expertly engineered

Ideal for placing under counters or in retail offices, every component has been optimised to reduce the overall size of the device, allowing you to make the most of your working space – all whilst delivering exceptional quality without compromising on performance.

Built to last

The MFC-L2960DW is built to last and requires minimal maintenance. It is expertly designed to be robust and durable and can handle the demands of any busy office environment. This, alongside high yield toners, means your business will be able to print for longer.

Solutions ready

Automate workflows and improve business processes and security with print management solutions. We offer a suite of document management, security and workflow solutions which can be added to the MFC-L2960DW to provide additional professional features to further improve your business processes.

Seamless integration

As a Brother customer, you will have access to a wide choice of leading software vendors including Tungsten Automation, YSoft and many more.

We work closely with our software partners across print management and document capture to create tailored solutions for your specific requirements. When we partner with a software vendor, we ensure your MFC-L2960DW works even harder to meet your needs.

Make printing simple with Brother MPS

MPS supports you to get the best out of your devices. That's why the MFC-L2960DW has been designed with MPS in mind.

Whatever your printing needs, we'll be "At your side" to find the solution that simplifies printer admin, saves time, keeps costs down and helps you stay productive, with:

- No long-term commitments
- Ink or toner delivery before you run out
- Quick breakdown support
- Easy supplies recycling

Secure by design

To keep pace with the ever-evolving legislation on privacy and data security, our devices offer the latest industry-standard security features to securely protect your data.

All our products are secure as standard. With businesses shifting towards Zero Trust environments, we know that security is your highest priority. Our security experts continuously research new enhancements to products, solutions and services to proactively ensure all our products are 'secure by design'.

The MFC-L2960DW provides a range of robust features. It uses triple-layer security at a device, network and document level which is verified through external security certification. This offers added peace of mind and guarantees that the integrity of your data is maintained at every step.

The MFC-L2960DW comes with a flexible suite of security features and solutions that can be tailored to your business, enabling you to easily audit, control and manage your fleet of devices securely.

Your device protects your business
by reducing its attack surface through:

Restricting privileges at a device level - with Secure Function Lock and Setting Lock, only authorised users are permitted access to specific functions.

Maintaining device integrity - with runtime intrusion detection, Secure Boot, digitally signed and encrypted firmware and end-to-end encrypted connections, devices are always performing at their optimum level of security.

Your network is protected with flexible features and management tools including:

Intrusion protection - with protocol management, interface restrictions and IPV4 filtering, you have the flexibility to adapt to your business needs.

Secure connection - securely connect to enterprise level wired and wireless networks through industry standard IEEE 802.1X.

Secure encrypted communication - by using flexible industry standards such as TLS, IPSEC, HTTPS and SNMP3, your business can tailor the device to its network.

Easily manage and configure your security profile - using device master settings, BRAdmin Pro 4 and mass deployment tool, your business can apply settings to entire fleets of devices.

Audit your devices - using SIEM integration through Syslog, you can gather real time usage information on your devices.

Your documents are protected through encryption, storage protection and secure print solutions including:

Encrypted document transfer - when you send your print data from your computer to the device, IPPS/HTTPS encryption ensures your data is secure and unreadable.

Secure data transfer - whether you are scanning to your local network or over the internet via Web Connect or a cloud-based service, your data is protected using TLS, HTTPS.

Non-persistent internal memory - all print job data is automatically wiped during a reboot and data is purged, ensuring no information is left on the device.

Secure print release - using a Brother secure print solution, documents are only released when you are ready to print and collect them.

3rd party integration - through Brother Solutions Interface (BSI), our devices can be fully integrated with trusted third party partners such as Tungsten Automation and YSoft, which adds an extra layer of security to your business.

Fax modem

33,600bps (Super G3)

Greyscale

256 shades (8 bit) of grey are available for faxing

Out of paper reception

Up to 500 pages
(ITU-T test chart, standard resolution, JBIG)

Broadcasting

Send the same fax message up to 250 locations

Memory transmission

Up to 500 pages
(ITU-T test chart, standard resolution, JBIG)

Fax functions

Internet fax (I-fax)

Fax documents over the internet as an email attachment

Fax to server

Scan a document and send it over the network to a separate fax server

Automatic redial

Automatic redialling if the recipient fax is busy

Telephone index

An electronic, alphabetical listing of stored speed dials and group numbers

Chain dialling

Allows the user to store parts for long dialing sequences in different speed dial locations

Fax forwarding

Sends a fax received in memory to another pre-programmed fax number

Remote retrieval

Allows users to remotely access their machine and retrieve stored fax messages

Fax stamp

Add the date and time to all received faxes

Cover page

Create custom cover pages for outgoing faxes

Station ID

An ID and fax number will be printed as the header of every fax sent

PC-fax send^{15,18} and receive^{16,18}

Send and receive faxes directly from your PC. Supports mono only

Error correction mode (ECM)

Detect line errors during fax transmission and resend the page(s) of the document that had an error (recipient machines must share this feature for it to work)

Auto reduction

When receiving a single page document longer than A4 (297mm) the fax machine will automatically reduce the message to fit onto a single A4 sheet

Fleet management tools

Unattended installer¹⁶

Ability to centrally deploy and customise our drivers and software

MSI installer¹⁶

Modular installers that can be distributed through On-premise Active Directory

BRAdmin^{16,17}

LAN/WAN management software

Embedded web server

Web based print management software embedded onto the device

Driver deployment wizard^{16,17}

Easily create print drivers for hassle free deployment over your network

Mass deployment tool¹⁶

Provide a configuration interface to help manage and deploy device settings

Status monitor¹⁶

Monitor the status of your machine from your computer

Software

Brother iPrint&Scan desktop^{15,17}

Print from, scan to, preview copies and check the machine status from Windows or macOS PC

IP filter

Restrict which network users can or cannot access the device over the network (IPv4 only)

Secure print

Protect print jobs with a four digit release code required at the device in order for them to be printed

Email notifications

Automatically have the device send email alerts when it requires attention, such as when the toner is low or needs replacing

Email reports

Receive usage reports on a regular basis via e-mail

SecureBoot

The integrity of the firmware is checked before allowing any user interaction. Only genuine Brother firmware can be used

Automatic intrusion detection

All Brother Print devices are secure by design. Devices automatically recognise security attacks and take preventative measures, including rebooting where necessary, to ensure the device remains secure

Firmware updates

In addition to allowing automatic update alerts to install the latest version the printer can be set to not receive older firmware versions to avoid downgrade by an unauthorised user

Firmware encryption

During update firmware is transferred over a trusted HTTPS encrypted connection

Digitally-signed firmware

The firmware for Brother print and scan devices is digitally signed and secure

Cloud secure print

Enables password protected driverless print job release

Setting lock

Secures access to the devices control panel by locking it

Certificate management

Use the default standard self-signed, create a custom self-signed certificate, certificate signing request (CSR), or external public certificate and private key for protected network communication

Secure Function Lock 3.0

Use a four digit pin or a password to identify and authenticate an individual or groups of users over a network. Allows access control for up to 100 users

Syslog

Allows IT admin to access a single application (SIEM tool) to get device status updates for audit purposes over Syslog

On-premise active directory/LDAP authentication

Utilise existing infrastructure to restrict access to Brother devices using AD/LDAP. Staff can easily use their existing network login credentials to authenticate

Port-based network access control

(IEEE 802.1x) Brother devices are in full compliance with this standard, to allow connection to an 802.1x EAP (extensible authentication protocol) protected network

Restrict network protocols

The protocol control feature allows an administrator to restrict communication protocols (e.g. FTP, Telnet) as required

Store print log

Allows audit of a print log file saved to CIFS server. Record ID, type, name, user, date, time, page count for every print job
