pagepro 5650EN

Professional, high speed office printing solution

Monochrome workgroup printer 43 ppm

Professional and **high speed**

Fulfil the most demanding office printing requirements with the pagepro 5650EN monochrome printer. Speed, durable build and enhanced image reproduction make it extremely qualified for high speed, professional-quality printing. Due to the latest processing technology, the pagepro 5650EN incorporates smoothly into your network, allowing you to discover how easy and versatile office printing can be. The pagepro 5650EN is a top-performance A4 printer designed for medium to large sized workgroups in a professional office environment that require high-quality and cost-efficient monochrome prints. Productivity can be enhanced further with an optional duplexer, offset stacker and an extra lower feeder.

➔ Achieve reliable results with high speed printing

Ensure that your printer meets the continuous demand for large quantities of monochrome documents. With the pagepro 5650EN's rapid print speed of 43 ppm. The first pages are turned out in 9.5 seconds – perfect for fast-paced businesses where every second counts. Powerful and reliable performance is backed by the very latest Emperon™ controller, 500 MHz processing and 128 MB standard memory.

→ Be prepared with up-to-the-minute processing and compatibility

The pagepro 5650EN is ready for the latest in document processing with native support of XPS (XML Paper Specification) from Microsoft Vista™ (HDD required). This new format revolutionises the way in which documents are printed and shared. Built into the Emperon™ system, compatibility with PostScript® 3™ and PCL® 6 printing languages, and a range of operating systems and business applications is also assured, as well as seamless integration into your existing network.

You can print files (PDF, TIFF, JPEG) straight from your USB memory stick, without PC intervention (HDD or CompactFlash™ card required). Reports and presentations are printed instantly.

→ Exercise more control over your printing

Control when your prints are released to the printer with the secure printing option on the pagepro 5650EN. By first setting an alphanumerical password on your computer, printing is delayed until you enter the code again on the front panel of the printer. You will be able to collect your prints immediately upon output – convenient when confidentiality is key.

Make job accounting simpler too. Details of every print job are tracked so departmental billings can be accurately calculated and costs can be controlled. Real-time status information, such as toner levels and printer problems, can be viewed on the PC with PageScope® Suite management tools (HDD or CompactFlash™ card required). With the all-in-one consumable cartridge, maintenance is easy.

→ Accommodate a range of printing needs

Enhance the productivity of your printing with the pagepro 5650EN, and tailor it to your business requirements. Tackle large volumes of prints – up to 1800 pages with the optional lower feeder – and a variety of paper types – up to 216 g/m^2. Special documents, such as invoices, packing lists, envelopes and labels, come out smooth and unspoiled, thanks to a built-in tray that ensures a direct paper path. Increase the capabilities further with the optional 500-sheet offset stacker and an optional duplexer – excellent for printing reports and booklets.

pagepro 5650EN

Technical specifications

Processor	500 MHz
Print speed (ppm)	43 ppm
Resolution	1200 x 1200 dpi
Duty cycle	200,000 pages per month
Memory	128 MB standard, 384 MB maximum

[1] Duplexer supports plain paper only

[2] Optional hard disk kit enables Secure printing, Proof-then-Print, Print & Hold, Job storing and XPS support in addition to all extra functions with CF card.

The addition of some options, in some combinations may cause the product to become non-compliant. Establishment of new regulations may cause the product to become non-compliant. Energy Star compliance does not represent an EPA endorsement of any product or service. Specifications and accessories are based on the information available at the time of printing, and are subject to change without notice. For the latest information, please visit www.konicaminolta.co.uk/printer.

The stated life expectancy of each consumable in the printer is based on printing under specific operating conditions such as page coverage for a particular page size (5 % coverage of A4). The actual consumables life will vary depending on the use and other printing variables including page coverage, page size, media type, continuous or intermittent printing, ambient temperature and humidity. For more information about toner life expectancy, visit http://printer.konicaminoltaeurope.com/tco
